

PROFESSIONAL SUMMARY

Full Stack Engineer and open source developer with 1+ year of experience building React frontends and Node.js/Express backends for production client platforms. Skilled in delivering high-performance, SEO-optimized interfaces, multilingual/localized routing, and REST APIs with JWT authentication. Comfortable owning a feature end-to-end from UI to API to deployment with a focus on writing clean, maintainable code

SKILLS

Frontend React.js, Next.js, Redux, Tailwind CSS, HTML, CSS	Programming Languages JavaScript, Java(basic)	Backend Node.js, Express.js, REST APIs, JWT Authentication, Joi Validation
Cloud & DevOps Docker, Nginx, GitHub Actions, CI/CD, PM2, DigitalOcean, AWS SES	Databases MongoDB, MySQL	Developer Tools Git, GitHub, Postman, Jira

WORK EXPERIENCE

Full Stack Developer, StepUp Analytics

June 2025 – Present | Remote, Netherlands

- Built the full admin panel for stepupanalytics.com — lead extraction, blog management, review management, and project management modules with JWT based secured login — and contributed to the UI of the public-facing website.
- Engineered high-performance React.js frontends across 7 client sites, **achieving Lighthouse scores 95+.**
- Implemented **multilingual routing and language-based URL** structures across client platforms, **improving SEO indexing** and localized search visibility — **contributing to a ~30% increase** in client business leads and engagement.
- Introduced caching for blog and Projects data, **cutting data retrieval time ~50%.**
- Designed a shared **AWS SES email service** (OTP, password reset, order confirmation, inquiry workflows) reused across 7 client platforms.
- Automated CI/CD with GitHub Actions, **cutting deployment time by ~70%,** deployed via Nginx on DigitalOcean.
- Key domains: stepupanalytics.com, 0900dentist.com, hasibo.nl, belquees.nl, maidicare.nl, hiddencourtyard.nl

PROJECTS

CrossCanals - <https://crosscanals.com>

June 2025 – August 2025

- Delivered a responsive B2B e-commerce frontend in React.js with role-specific dashboards for **3 user roles, consuming 25+ REST APIs** built for the platform.
- Solved **race conditions in checkout** using MongoDB transactions and server-side validation logic, eliminating overselling and duplicate-order creation under multiple concurrent requests.
- Reduced application load time ~30% through lazy loading,** asset optimization, and efficient API design.
- Secured the platform with JWT authentication,** refresh token rotation, and Joi validation.
- Shipped a **custom order feature** allowing users to upload personalized image designs during checkout, routed directly to sellers — a key platform differentiator.
- Added pagination, filtering, search, form validation, and protected/role-based routing across all dashboards.

text-gradients (NPM Package) - <https://www.npmjs.com/package/text-gradients>

August 2024 – August 2024

- Developed and published a reusable React component package on NPM **with 1000+ total downloads.**
- Created modular and maintainable package architecture for easy integration into frontend applications.

Lucky Draw Software - <https://imc-lucky-draw.vercel.app>

July 2023 – August 2023

- Replaced a manual Excel-based lucky draw process with a scalable web application **handling 120K+ entries in MongoDB.**
- Cut winner selection time from nearly 1 minute to approximately **2 second using optimized MongoDB random sampling.**
- Developed backend APIs and admin workflows for real-time draw execution and participant management.

EDUCATION

Integrated Masters of Computer Applications (MCA)
International Institute of Professional Studies, DAVV, Indore
Graduated: June 2026 | CGPA: 8.1/10 | Indore, MP

ACHIEVEMENTS

- GirlScript Summer of Code **128 Merged Pull Requests (4225 points)** ranked among the top contributors [LINK](#)
- 4 Pull Requests** merged into FreeCodeCamp repository [LINK](#)
- Solved 300+ Data Structures and Algorithms** problems across LeetCode and GeeksforGeeks
